

Muhammad Ikhwan

Location: Tangerang, Indonesia • **Email:** m.ikhwan.online@gmail.com

LinkedIn: linkedin.com/in/ikhwan-muhammad • **Portfolio:** mikhwan89.github.io/data-analytics-portfolio

Data leader with 15 years across fintech, crypto, ride-hailing and e-commerce, from market analyst to VP. I build analytics teams from zero, design the data platforms they run on, and turn analysis into budget, pricing and growth decisions. Most recently I designed an open-source, analytics-as-code BI stack co-managed with AI, cutting BI cost by about 90%.

Work Experience

01/2024 — Present
Jakarta, Indonesia

VP of Data and Strategy CAMP Investment Technologies

- Designed and built the company's end-to-end BI stack as code on open-source tools (Dagster, PostgreSQL, dbt, Cube, Firebase Auth): 12 sources ingested hourly, 90+ dbt models, and row-level security so each user reads only their own data.
- **Cut BI stack cost by about 90%** by removing per-seat BI licences and running the whole stack on a single 4-core / 16 GB server, co-managed with AI (Claude Code) for index design, query tuning and mart architecture.
- Built a sales portal that goes beyond reporting: performance dashboards, market data and news, product knowledge, client simulations (DCA, bitcoin allocation, structured-product payoff) and a CRM with write-back.
- Built operational monitoring that reconciles product ledgers against wallet movements and alerts on settlement discrepancies.
- Delivered data-driven investment research to clients through reports and articles, and created an educational curriculum on Bitcoin fundamentals.

04/2022 — 12/2023

VP of Growth Tokenomy

- Supervised data and marketing operations to ensure seamless collaboration and goal achievement.
- Streamlined content production by integrating AI tools for scripting, translation and video creation, reducing turnaround time.
- Applied data insights to guide strategic decisions, optimize resources and prioritize high-impact initiatives.
- Implemented data alert systems to monitor asset flows and enable faster operational responses.

01/2022 — 04/2022

Head of Analytics Tokenomy

- Led the development and management of the datamart and its processes in the data warehouse, streamlining data access and improving reporting accuracy.
- Developed data models, master datasets, dashboards and alerts in Power BI and Metabase.
- Analyzed business performance, providing actionable insights to leadership for growth and efficiency initiatives.

06/2021 — 12/2021
Jakarta, Indonesia

Head of Strategic Planning, GrabMart Grab

- Developed short- and long-term strategies to drive business growth and market performance.
- Oversaw budget planning, monitoring and control, leading to more efficient resource allocation and cost savings.
- Identified product gaps through analysis, keeping the offering competitive.
- Aligned marketing, campaigns, operations, commercial, sales and product teams to execute action items.

08/2019 — 06/2021
Greater Jakarta Area

Head of Data Analytics & Business Intelligence Group LinkAja

- Built the analytics team from zero and led multiple data and analytics units, shaping company-wide data strategy.
- Implemented BigQuery, Airflow and Looker as the core data platform, with LookML as the governed semantic layer so every dashboard used one set of metric definitions.
- Designed the data lake and warehouse architecture, and built a platform for merchant data cleanup.
- Created user scoring and merchant clustering models, and ran A/B tests to promote data-driven experimentation.

05/2019 — 08/2019
Greater Jakarta Area

Acting Head of Economics and Analytics Grab

- Designed a unified 2-wheel driver incentive framework across GrabFood, GrabBike, GrabMart and GrabExpress, **lifting fulfilment rates by 15–20 percentage points** in the problem hours and verticals while lowering incentive cost.
- Standardized operations for scalable, targeted spending and optimized budget allocation across verticals.

06/2017 — 05/2019
Greater Jakarta Area

Country Lead Business Analytics Grab

- Built fraud detection that excluded fraudulent trips and bad-actor drivers from incentive eligibility, **cutting driver incentive cost by 70%**.
- Built the subcity location mapping layer, which became the **second most queried table** in Grab's data warehouse.
- Led the growth of the Indonesia data analytics team and promoted cross-country collaboration among regional analysts.
- Conducted market feasibility studies for new verticals and automated data processes to scale them efficiently.

01/2017 — 06/2017
Yangon, Myanmar

Lead Project Manager UMG Myanmar

- Led business process design, market entry strategy and the organizational structure for a new startup initiative.
- Built interactive Power BI dashboards for performance monitoring.

01/2015 — 12/2016
Indonesia

Head of Business Intelligence & Data Management Alfacart

- Established and led the Business Intelligence team, building a data-driven culture.
- Designed price recommendation and product suggestion algorithms applied directly to the e-commerce platform, improving sales conversion.
- Automated reporting and built live Tableau dashboards for real-time business monitoring.

04/2014 — 12/2014
Greater Jakarta Area

Business Planner and Analyst
Lazada Indonesia

- Created "Hidden Gem" and "Unpolished Gem" product metrics that surfaced high-potential and under-converting products for the commercial team.
- Defined performance targets and data-driven business plans for Key Account Managers.

02/2011 — 04/2014
Greater Jakarta Area

Market Analyst
IDC (International Data Corporation)

- Researched Indonesia's IT services and imaging, printing and document solutions markets, covering Indonesia and Malaysia trackers.
- Built a VBA-based Excel input module that streamlined the team's data entry, and delivered insights to vendors and clients.

Skills	
LEADERSHIP	Building data teams from zero, data strategy, budget planning, growth analytics, stakeholder management
BI & SEMANTIC LAYER	Looker (LookML), Holistics, Cube, Tableau, Power BI, Metabase, Looker Studio
DATA & PIPELINES	PostgreSQL, BigQuery, plpgsql, dbt, Dagster, Airflow, Fivetran, Python, R
AI & INFRASTRUCTURE	Claude Code, Firebase Auth, GCP, Linux, Nginx, Git
LANGUAGES	Bahasa Indonesia (native), English (professional), Bahasa Melayu (professional)

Education	
2007 — 2010 Selangor, Malaysia	Marketing, E-Business Business and Commerce Monash University Malaysia
2006 — 2007 Selangor, Malaysia	Canadian International Matriculation Programme
